Snapshot Report

NCES 2006-454II 8

The National Assessment of Educational Progress (NAEP) assesses mathematics in five content areas: number properties and operations; measurement; geometry; data analysis and probability; and algebra. The NAEP mathematics scale ranges from 0 to 500.

Overall Mathematics Results for Illinois

- In 2005, the average scale score for eighth-grade students in Illinois was 278. This was not significantly different from¹ their average score in 2003 (277), and was higher than their average score in 1990 (261).
- Illinois' average score (278) in 2005 was not significantly different from that of the Nation's public schools (278).
- Of the 52 states and other jurisdictions² that participated in the 2005 eighth-grade assessment, students' average scale scores in Illinois were higher than those in 17 jurisdictions, not significantly different from those in 9 jurisdictions, and lower than those in 25 jurisdictions.
- The percentage of students in Illinois who performed at or above the NAEP *Proficient* level was 29 percent in 2005. This percentage was not significantly different from that in 2003 (29 percent), and was greater than that in 1990 (15 percent).
- The percentage of students in Illinois who performed at or above the NAEP Basic level was 68 percent in 2005. This percentage was not significantly different from that in 2003 (66 percent), and was greater than that in 1990 (50 percent).

Accommodations were not permitted for this assessment

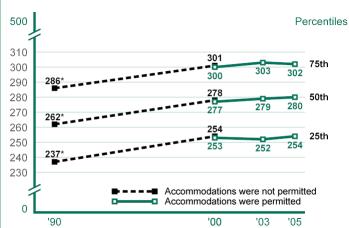

NOTE: The NAEP mathematics achievement levels correspond to the following scale points: Below Basic, 261 or lower; Basic, 262–298; Proficient, 299–332; Advanced, 333 or above.

Performance of NAEP Reporting Groups in Illinois						
	Percent	Average	Percent	Percent of stud	ents at or above	Percent
Reporting groups	of students	score	below Basic	Basic	Proficient	Advanced
Male	51	279	30	70	30	6
Female	49	276	34	66	27	5
White	61	289	18	82	39	8
Black	21	249	66	34	6	#
Hispanic	14	265	45	55	13	1
Asian/Pacific Islander	4	300	10	90	50	15
American Indian/Alaska Native	#	‡	‡	‡	‡	‡
Eligible for free/reduced-price school lunch	38	258	54	46	10	1
Not eligible for free/reduced-price school lunch	62	290	18	82	40	8

Average Score Gaps Between Selected Groups

- In 2005, male students in Illinois had an average score that was not found to be significantly different from that of female students.
 In 1990, there was no significant difference between the average score of male and female students.
- In 2005, Black students had an average score that was lower than that of White students by 40 points. In 1990, the average score for Black students was lower than that of White students by 38 points.
- In 2005, Hispanic students had an average score that was lower than that of White students by 24 points. In 1990, the average score for Hispanic students was lower than that of White students by 33 points.
- In 2005, students who were eligible for free/reduced-price school lunch, an indicator of poverty, had an average score that was lower than that of students who were not eligible for free/reduced-price school lunch by 32 points. In 2000, the average score for students who were eligible for free/reduced-price school lunch was lower than the score of those not eligible by 30 points.
- In 2005, the score gap between students at the 75th percentile and students at the 25th percentile was 48 points. In 1990, the score gap between students at the 75th percentile and students at the 25th percentile was 49 points.

Scores at selected percentiles on the NAEP mathematics scale indicate how well students at lower, middle, and higher levels of the distribution performed.

- # The estimate rounds to zero.
- * Significantly different from 2005.

- ‡ Reporting standards not met.
- ↑ Significantly higher than 2003. ↓ Significantly lower than 2003.
- ¹ Comparisons (higher/lower/not different) are based on statistical tests. The .05 level was used for testing statistical significance. Performance comparisons may be affected by differences in exclusion rates across years for students with disabilities (3% nationally in 2005) and English language learners (1% nationally in 2005) in the NAEP samples. Statistical comparisons are calculated on the basis of unrounded scale scores or percentages.
- ² "Other Jurisdictions" refers to the District of Columbia and the Department of Defense Education Activity schools.

NOTE: Detail may not sum to totals because of rounding and because the "Information not available" category for free/reduced-price lunch and the "Unclassifed" category for race/ethnicity are not displayed. Visit http://nces.ed.gov/nationsreportcard/states/ for additional results and detailed information.
